

Jane Chen

jane_chen@student.ubc.ca • Vancouver, BC

Education

BASc Computer Engineering, University of British Columbia
Second year • Expected 2029

Experience

Undergraduate Research Assistant, Robotics Lab

Built a ROS node for logging sensor data at 200 Hz and wrote the replay tooling the team used to debug field tests.

Teaching Assistant, Introduction to Programming

Ran weekly labs for 40 students and marked project submissions.

Projects

Campus energy dashboard

Python collector writing to Postgres, React front end, deployed with Docker. Handled gaps in meter data explicitly rather than interpolating over them.

Skills

Python • TypeScript • React • ROS • Docker • Git • Linux

Page two

Two pages on purpose: a one-page fixture cannot show whether scrolling still works once the viewer chrome is suppressed.
